Subject: Following up on next steps re Class II Program

Hi Steve,

I just wanted to send you this email for the purposes of tracking our progress and to make sure we are on the same page with regard to next steps discussed on our most recent call.

We appreciate that DOGGR is continuing to make improvements to the August 18th draft of the Work Plan. We had agreed that we would review this new version which we will receive next week and follow with a conference call the week of Sept 8 to discuss the updated DRAFT workplan. We agreed that the new DRAFT will include a schedule for plan revisions and for completing implementation of the plan, as requested in EPA's July 17 letter.

DOGGR is working with operators to further QA/verify data sent to EPA on Aug 18th (spreadsheet of 532 injection wells) and expects to complete that effort in the next 2-3 weeks. DOGGR and EPA will arrange a face-to-face staff meeting to discuss specific data questions following this effort. Based on the schedule outlined this meeting will likely occur after September the 15th.

We have also previously discussed meeting on the broader strategy of the program and upcoming aquifer exemption work. I suggest that we proceed to schedule this meeting. We can build off

our meeting (call) planned for the 10th and have it as a face to face in Sacramento if that works otherwise your scheduler can get back to us with some suggested dates and times either here or there.

Thanks and have a great long weekend.

Mike
